

WE ARE HIRING

MICROBIOLOGIST

Department: Microbiology Laboratory

Industry: Injectable Pharmaceuticals

 **Location:** Bamanva, Khambhat, Gujarat

 **Experience:** Fresher to 2 Years

KEY RESPONSIBILITIES

Sterility Testing

- Perform membrane filtration and direct inoculation tests for injectable products.
- Ensure finished batches meet microbiological sterility requirements.

Bacterial Endotoxin Testing (BET)

- Perform **LAL assays** for detection of bacterial endotoxins.

Environmental Monitoring

- Monitor cleanroom air, surfaces, compressed gases and operator gowning.
- Perform settle plate, active air sampling and surface swab testing.

Water System Testing

- Sample and test **Purified Water (PW)** and **Water for Injection (WFI)** systems.
- Perform microbial bioburden testing and related analysis.

Media Fill Validation

- Support **aseptic process simulations/media fill** activities for sterile manufacturing operations.

Investigation & CAPA

- Handle **OOS results and deviations**.
 - Support investigations and implementation of **Corrective & Preventive Actions (CAPA)**.
-

QUALIFICATIONS & SKILLS

Education

- Bachelor's or Master's degree in ****Microbiology, Biotechnology****.

Experience

- **Fresher to 2 years** of experience.
- Experience in **sterile/injectable pharmaceutical manufacturing** preferred.

Regulatory Knowledge

- Working knowledge of **cGMP, GLP, USP**, standards.

Technical Skills

- Aseptic techniques
 - Microbial identification
 - Growth promotion testing
 - Data integrity and GMP documentation
-
